An update of Claim 360°: announcing Omni!

As previously announced, in spring 2021, the Claim 360° app will be given a facelift and a new name – Omni. It'll be a simple update, and Omni will become the new mobile app for Desjardins group plans.

Omni will include all the current functionalities of Claim 360° in a **more modern, user-friendly interface** and will also allow plan members to manage their **Desjardins group retirement savings account** (if applicable). They'll be able to make a variety of transactions and access a wide range of online services right from their phone.

Plan members will also have the option of **biometric authentication** (by facial recognition or fingerprint) in addition to password login.

A message to Claim 360° users

In the coming days, an update of our Claim 360° app will be available in the App Store and on Google Play. This update will show users a short message announcing the change to come:

Claim 360° will soon have a brand new name – Omni!
It'll have all the features of Claim 360° with a new, simpler and more user-friendly interface!

We'll be sending another communication once Omni has been launched. Plan members who haven't downloaded Claim 360° yet can still do so, this way, they won't miss Omni's launch.

We'll be posting a communication similar to this one on the plan administrator and plan member secure sites.

If you have any questions, please contact your Desjardins Insurance account executive.
